

INTERNSHIP REPORT PRESENTATION

Artificial Intelligence Internship

Codec Technologies Pvt. Ltd. | AICTE & ICAC Approved Program | Google for Education Partner

Gulshan Raj

Roll No. 25SCS1003001289 | B.Tech CSE

Session 2025 – 2029 | IILM University

Gulshan Raj

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

25SCS1003001289

Institute

IILM University

Programme

B.Tech CSE, Session 2025 – 2029

Internship Domain

Artificial Intelligence

Duration

2 Months | 07 June 2026 – 08 August 2026

Codec Technologies, AICTE & Google for Education

Codec Technologies Pvt. Ltd. runs an AICTE & ICAC approved internship program, offered as a Google for Education partner initiative. This 2-month Artificial Intelligence Intern track gave hands-on, industry-aligned exposure to core AI and machine learning concepts, moving beyond classroom theory into practical, applied learning.

AICTE & ICAC Approved

Recognised internship program under national skilling initiatives.

Codec Technologies

Industry mentorship from Codec Technologies Pvt. Ltd.

Google for Education

Delivered as part of the Google for Education partner network.

PROBLEM STATEMENT

Bridging Theory and Applied AI

Engineering students often learn the theoretical foundations of Artificial Intelligence and Machine Learning in coursework, but rarely get structured, hands-on practice applying core concepts — like Python-based model building, neural networks, and real-world AI applications — to solve practical problems.

This internship addressed that gap — building a practical, project-based AI workflow:

What the Internship Set Out to Achieve

Learn Python for AI

Build strong Python foundations as the core language for AI & ML development.

Understand Machine Learning

Grasp ML fundamentals — supervised/unsupervised learning, and how models learn from data.

Explore Neural Networks

Understand the structure and working of neural networks used in modern AI systems.

Apply AI Concepts

Translate theory into applied AI use-cases and simple real-world problem solving.

Evaluate Models

Learn to assess model performance and understand accuracy, training & testing basics.

Complete Assessments

Clear program modules and assessments to earn the internship certification.

The Toolkit Behind the Internship

Python

Core programming language

Machine Learning

Core algorithms & concepts

Neural Networks

Deep learning fundamentals

AI Applications

Applied, real-world use-cases

Data Handling

Datasets & preprocessing

Model Building

Training & evaluation basics

Libraries & Frameworks

Standard Python AI/ML tooling

Assessments

Module tests & final validation

The 2-Month Learning Journey

1

Month 1 — Foundations

Python programming basics, core Machine Learning concepts, and an introduction to how AI systems are trained.

2

Month 1 — Deep Dive

Understanding Neural Networks — structure, layers, and how learning happens inside a model.

3

Month 2 — Application

Applying AI/ML concepts to hands-on exercises and mini practical tasks.

4

Month 2 — Assessment

Module assessments, final evaluation, and successful completion of the internship program.

EXPECTED OUTCOMES

Skills & Capabilities Gained

Working knowledge of Python for AI & Machine Learning development

Conceptual and practical understanding of core Machine Learning algorithms

Ability to explain the structure and working of Neural Networks

Exposure to applying AI concepts to real-world style problems

Understanding of how models are trained, tested and evaluated

Successfully completed the 2-month AICTE & ICAC approved AI Internship

CERTIFICATION

Successfully Completed

Organization

Codec Technologies Pvt. Ltd.

Domain

Artificial Intelligence Intern

Duration

2 Months | 07 Jun 2026 – 08 Aug 2026

Approved By

AICTE & ICAC | Google for Education
